

PROBLEM SOLVED

2012 International Feed Expo

ADF invites you to visit our booth at the upcoming [IPE/IFE](#) Annual Expo at the Georgia World Congress Center in Atlanta, January 24- 26, 2012.

Alex Fishman, Steve Minnich and Robert Stroup will be on hand to discuss ADF's capabilities and expertise in the Grain Processing, Animal Feed and Pet Food Industries. We look forward to connecting with you at **Booth # 111, Hall A.**

Your partnership with an experienced engineering company can help your operations be more profitable. ADF Engineering offers extensive knowledge and a high level of Process and Facility engineering experience in Animal Feeds, Pet Foods and Grain Processing from process development thru operations. Every year ADF executes over 300 value-driven projects.

ADF is an Industry Expert in Food, Feed, and Grain

ADF Engineering has completed various projects in Food and Feed Processing based on the direction and needs of our Clients. Below is a short list of recently completed ADF projects:

- Engineering and Process Definition for production of high quality Dairy Feed.
- Provided all phases of engineering and 3D modeling for a new process line to produce high value feed additives at an animal nutrition ingredient plant.
- Conducted Process Safety Studies for a major multi-site Pet Food Company.
- Completed various Dust Collection and Explosion Prevention projects for grain and ingredient processing plants.
- Designed food safety sanitation system effective against pathogens, including Salmonella and E.coli.

- Conducted Hammermill airflow studies and troubleshooting.
- Created As-Built "Intelligent" P&ID's for various Grain Processing Plants
- Designed Water Supply Expansion for premium Pet Food Operation.
- Completed Wastewater Management project at a Corn Processing Plant.
- Evaluated and specified humidity control systems for microbial mitigation in materials handling systems for three major Pet Food Plants.
- Ingredient Unloading and Pneumatic Transfer Projects at various sites.

ADF also developed a new process system to sanitize Feed during pelleting and loadout. To learn more about ADF Engineering's Solutions for the Food and Feed Processing Industry, please view our [online brochure](#).

ADF Engineering

ADF Engineering is a full service engineering and consulting firm serving the Food, Feed, BioFuel, and Bio industries. ADF provides engineering and support throughout all phases of projects ranging from your business plan to commissioning. ADF Engineering has accumulated an impressive client list including Fortune 500 companies by offering all disciplines of engineering expertise including process, chemical, civil/structural, mechanical, electrical and instrumentation/controls.
