To Whom it May Concern:

In recent years, Flowserve of Dayton, Ohio, has come to rely on ADF Engineering as a highly capable Engineering and Consulting firm. ADF has provided emergency engineering services beyond regular business hours with an exceptional response time. They have provided services ranging from structural evaluation and design through construction management assistance and project support. ADF has displayed ownership qualities throughout all phases of the engineering and construction processes and has assisted in contractor selection based on their professional experience, which has resulted in improved project completion times and has helped mitigate the risks associated with any new contractor selection process.

Flowserve of Dayton would strongly recommend ADF Engineering as they have provided responsive and efficient engineering services to our company.
